Application No.: 09/471,971 2 Docket No.: 09386/100F051-US1

LISTING OF THE CLAIMS

Claims 1 and 2 (Cancelled)

- 3. (Currently Amended) A method for distributing electronic information using a computer network comprising the steps of:
 - a. receiving from a consumer a request for a selected item of information;
- b. formulating one or more offers based on predefined <u>upstream</u> business rule parameters wherein the one or more offers are associated with the selected item of information;
- c. dynamically updating the predefined upstream business rule parameters;

 [[c]] d. providing the one or more offers to the consumer based on the dynamically updated upstream business rule parameters;
- [[d]] e. receiving a selection of one of the offers from the consumer; and
- [[e]] <u>f</u>. delivering the requested information to the consumer and enabling the consumer to use the delivered information in accordance with the selected offer.
- 4. (Previously Presented) The method as in claim 3, further comprising the step of validating the one or more offers for the selected item of information requested by the consumer.
- 5. (Previously Presented) The method as in claim 4, wherein the validating step further comprises the steps of:
 - a. for at least one offer, referencing an electronic contract;
 - b. determining whether the offer is consistent with the electronic contract; and

Application No.: 09/471,971 3 Docket No.: 09386/100F051-US1

c. validating the offer when the offer is consistent with the electronic contract.

6. (Previously Presented) The method as in claim 5, further comprising the step of providing an alternative offer when the offer is determined to be invalid.

7. (Previously Presented) The method as in claim 5, further comprising the step of providing a default offer when the offer is determined to be invalid.

8. (Previously Presented) The method as in claim 4, wherein the validating step further comprises the step of generating rights data which determine the one or more offers associated with the information requested.

- 9. (Previously Presented) The method as in claim 8, wherein the generating step is performed prior to the delivering step and the rights data is delivered together with the requested information.
- 10. (Previously Presented) The method as in claim 8, further comprising the step of providing the rights data to the consumer in a secure format.
- 11. (Previously Presented) The method as in claim 8, further comprising the step of dynamically updating the rights data.

Application No.: 09/471,971 4 Docket No.: 09386/100F051-US1

12. (Previously Presented) The method as in claim 3, further comprising the step of executing a financial transaction between the consumer and a retailer related to the use of the requested information.

- 13. (Previously Presented) The method as in claim 3, further comprising the step of indicating to a player associated with the consumer that the selected item of information may be rendered according to the consumer's request only when said request is consistent with said selected offer.
- 14. (Previously Presented) The method as in claim 3, further comprising the step of verifying the current validity of the previously selected offer at a point in time subsequent to the selection of the offer.
- 15. (Previously Presented) The method as in claim 3, further comprising the steps of:
- a. receiving a request from the consumer for additional material about the selected item of information; and
- b. providing additional material about said selected item of information to the consumer.
- 16. (Previously Presented) The method as in claim 15, further comprising the step of providing a sample of said selected item of information.

17. (Previously Presented) The method as in claim 3, further comprising the step of providing payment alternatives about said selected item of information to the consumer.

- 18. (Previously Presented) The method as claim 3, further comprising the steps of:
 - a. determining whether the consumer has a player; and
- b. providing the consumer with the player when the consumer does not have the player; and
 - c. activating the player for the consumer.
- 19. (Previously Presented) The method as in claim 3, wherein the delivering step is performed after the enabling step, at a time designated by the consumer.
- 20. (Previously Presented) The method as in claim 3, wherein the delivering step further comprises the step of delivering audio information.
- 21. (Previously Presented) The method as in claim 3, wherein the delivering step further comprises the step of delivering graphical information.
- 22. (Previously Presented) The method as in claim 3, wherein the delivering step further comprises the step of delivering electronic information in a secure format.

23. (Previously Presented) The method as in claim 3, further comprising the step of providing the one or more offers to the consumer in a secure format.

- 24. (Previously Presented) The method as in claim 3, further comprising the step of monitoring the use by the consumer of the delivered information.
- 25. (Previously Presented) The method as in claim 24, wherein the monitoring step further comprises the steps of:
 - a. detecting the manner of use of the information previously delivered to the consumer;
 - b. determining whether the use is within the scope of the selected offer; and
 - c. preventing the use when the use is not within the scope of the selected offer.
- 26. (Previously Presented) The method as in claim 25, further comprising the step of tracking the use when the use is within the scope of the selected offer.
- 27. (Previously Presented) The method as in claim 26, further comprising the step of effecting a financial transaction according to the tracked use.
- 28. (Previously Presented) The method as in claim 27, further comprising the step of effecting a financial transaction according to the selected offer.

Application No.: 09/471,971 7 Docket No.: 09386/100F051-US1

29. (Previously Presented) The method as in claim 3, further comprising the step of providing an offer that allows the consumer to pay an amount for each instance of use of the information.

- 30. (Previously Presented) The method as in claim 3, further comprising the step of providing an offer that allows the consumer to pay a fee for unlimited use of the information for a period of time.
- 31. (Previously Presented) The method as in claim 3, wherein the step of receiving a request further comprises the steps of:
 - a. receiving a query containing one or more search terms from the consumer;
- b. referencing a catalog to determine whether there is any entry containing the one or more search terms;
- c. returning to the consumer one or more content references corresponding to any entry containing the one or more search terms when such entry is present in the catalog; and
- d. receiving from the consumer a content reference selected by the consumer indicating a request for the information identified by the content reference.
- 32. (Previously Presented) The method as in claim 3, further comprising the step of receiving from a content owner an electronic contract representing an agreement between the content owner and a retailer.

Application No.: 09/471,971 8 Docket No.: 09386/100F051-US1

33. (Currently Amended) The method as in claim 3, further comprising the step of receiving from a content owner one or more <u>upstream</u> business rules representing conditions for the distribution of selected item of information.

- 34. (Previously Presented) The method as in claim 3, further comprising the steps of:
 - a. receiving a candidate offer from a retailer;
 - b. certifying the candidate offer as a certified offer; and
 - c. sending the certified offer to the retailer.
- 35. (Previously Presented) The method as in claim 34, further comprising the steps of:
 - a. determining whether the candidate offer is consistent with an electronic contract; and
- b. designating the candidate offer as the certified offer when there are no inconsistencies.
- 36. (Currently Amended) The method as in claim 34, further comprising the steps of:
- a. determining whether the candidate offer is consistent with [[a]] <u>an upstream</u> business rule; and
- b. designating the candidate offer as the certified offer when there are no inconsistencies.
- 37. (Previously Presented) The method as in claim 3, further comprising the steps of:

Application No.: 09/471,971 9 Docket No.: 09386/100F051-US1

a. determining whether there is an offer accompanying the request for the selected item of information received from the consumer; and

- b. supplying an offer to the consumer when there is no offer accompanying the request received from the consumer.
- 38. (Previously Presented) A method for delivering electronic information using a computer network comprising the steps of:
 - a. sending a content reference from a first consumer to a second consumer;
- b. at a central location, receiving from said second consumer a request to render a selected item of information identified by the content reference;
- c. determining whether the second consumer is authorized to use the selected item of information; and
- d. at the second consumer, rendering the selected item of information when the second consumer is authorized to use the selected item of information.
- 39. (Previously Presented) The method as in claim 38, further comprising the step of providing the selected item of information identified by the content reference to the second consumer.
- 40. (Previously Presented) The method as in claim 38, further comprising the steps of:
- a. providing the second consumer with one or more offers for the selected item of information; and

b. receiving from the second consumer a selection of one of the offers for the selected item of information.

- 41. (Previously Presented) The method as in claim 38, wherein the determining step further comprises the steps of:
- a. referencing an offer associated with the content reference received from the second consumer;
 - b. verifying the validity of the associated offer; and
 - c. determining whether the request to render is consistent with the associated offer.
- 42. (Currently Amended) A system for distributing electronic information comprising:
- a. a request input section module for receiving a request for a selected item of information from a consumer;
- b. an offer formulation section module for formulating one or more offers based on predefined upstream business rule parameters, wherein the one or more offers are associated with the selected item of information;
- c. a dynamic update module for dynamically updating the predefined upstream business rules;
- [[c]] <u>d</u>. an offer providing <u>section</u> <u>module</u> for providing the one or more offers to the consumer based on the dynamically updated business rules;
- [[d]] e. a selection input section module for receiving a selection of one of the offers from the consumer; and

Application No.: 09/471,971 11 Docket No.: 09386/100F051-US1

[[e]] \underline{f} . a delivery section module for delivering the requested information to the consumer and enabling the consumer to use the delivered information in accordance with the selected offer.

- 43. (Currently Amended) The system as in claim 42, further comprising a validating section module for validating the one or more offers for the selected item of information requested by the consumer.
- 44. (Currently Amended) The system as in claim 43, wherein for at least one offer, the validating section module references an electronic contract; determines whether the offer is consistent with the electronic contract; and validates the offer when the offer is consistent with the electronic contract.
- 45. (Currently Amended) The system as in claim 44, wherein the validating section module provides an alternative offer when the offer is determined to be invalid.
- 46. (Currently Amended) The system as in claim 44, wherein the validating section module provides a default offer when the offer is determined to be invalid.
- 47. (Currently Amended) The system as in claim 43, wherein the validating section module generates rights data which determine the one or more offers associated with the information requested.

48. (Currently Amended) The system as in claim 47, wherein the validating section module generates the rights data prior to delivering the requested information and delivers the rights data together with the requested information.

- 49. (Currently Amended) The system as in claim 47, wherein the validating section module provides the rights data to the consumer in a secure format.
- 50. (Currently Amended) The system as in claim 47, wherein the validating section module dynamically updates the rights data.
- 51. (Currently Amended) The system as in claim 42, further comprising a transaction processing section module for executing a financial transaction between the consumer and a retailer related to the use of the requested information.
- 52. (Previously Presented) The system as in claim 42, further comprising a player associated with the consumer wherein the player renders the selected item of information according to the consumer's request only when said request is consistent with said selected offer.
- 53. (Currently Amended) The system as in claim 43, wherein the validating section module verifies the current validity of the previously selected offer at a point in time subsequent to the selection of the offer.

Application No.: 09/471,971 13 Docket No.: 09386/100F051-US1

54. (Currently Amended) The system as in claim 42, wherein the request receiving section module receives a request from the consumer for additional material about the selected item of information; and wherein the delivery section provides additional material about said selected item of information to the consumer.

- 55. (Currently Amended) The system as in claim 54, wherein the delivery section module provides a sample of said selected item of information.
- 56. (Currently Amended) The system as in claim 42, wherein the delivery section module provides payment alternatives about said selected item of information to the consumer.
- 57. (Currently Amended) The system as claim 42, further comprising a registration section module which operates to:
 - a. determine whether the consumer has a player; and
- b. provide the consumer with the player when the consumer does not have the player; and
 - c. activate the player for the consumer.
- 58. (Currently Amended) The system as in claim 42, wherein the delivery section module delivers the requested information after enabling the consumer, at a time designated by the consumer.

59. (Currently Amended) The system as in claim 42, wherein the delivery section module delivers audio information.

- 60. (Currently Amended) The system as in claim 42, wherein the delivery section module delivers graphical information.
- 61. (Currently Amended) The system as in claim 42, wherein the delivery section module delivers electronic information in a secure format.
- 62. (Currently Amended) The system as in claim 42, wherein the offer formulating section module provides the one or more offers to the consumer in a secure format.
- 63. (Currently Amended) The system as in claim 42, further comprising a monitoring section module for monitoring the use by the consumer of the delivered information.
- 64. (Currently Amended) The system as in claim 63, wherein the monitoring section module detects the manner of use of the information previously delivered to the consumer; determines whether the use is within the scope of the selected offer; and prevents the use when the use is not within the scope of the selected offer.

Application No.: 09/471,971 15 Docket No.: 09386/100F051-US1

65. (Currently Amended) The system as in claim 64, further comprising a tracking section module for tracking the use by the consumer of the requested information when the use is within the scope of the selected offer.

- 66. (Currently Amended) The system as in claim 65, further comprising a transaction processing section module for effecting a financial transaction according to the tracked use.
- 67. (Currently Amended) The system as in claim 66, wherein the transaction processing section module effects the financial transaction according to the selected offer.
- 68. (Currently Amended) The system as in claim 42, wherein the offer formulating section module provides an offer that allows the consumer to pay an amount for each instance of use of the information.
- 69. (Currently Amended) The system as in claim 42, wherein the offer formulating section module provides an offer that allows the consumer to pay a fee for unlimited use of the information for a period of time.
- 70. (Currently Amended) The system as in claim 42, further comprising a query section module which operates to:
 - a. receive a query containing one or more search terms from the consumer;

Application No.: 09/471,971 16 Docket No.: 09386/100F051-US1

b. reference a catalog to determine whether there is any entry containing the one or more search terms;

- c. return to the consumer one or more content references corresponding to any entry containing the one or more search terms when such entry is present in the catalog; and
- d. receive from the consumer a content reference selected by the consumer indicating a request for the information identified by the content reference.
- 71. (Currently Amended) The system as in claim 42, wherein the offer formulating section module utilizes an electronic contact representing an agreement between a content owner and a retailer in formulating the one or more offers.
- 72. (Currently Amended) The system as in claim 42, wherein the offer formulating section module utilizes one or more business rules representing conditions for the distribution of selected item of information in formulating the one or more offers.
- 73. (Currently Amended) The system as in claim 42, further comprising a certifying section module for certifying a candidate offer received from a retailer as a certified offer and sending the certified offer to the retailer.
- 74. (Currently Amended) The system as in claim 73, wherein the certifying section module determines whether the candidate offer is consistent with an electronic contract and designates the candidate offer as the certified offer when there are no inconsistencies.

Application No.: 09/471,971 17 Docket No.: 09386/100F051-US1

75. (Currently Amended) The system as in claim 73, wherein the certifying section module determines whether the candidate offer is consistent with a business rule and designates the candidate offer as the certified offer when there are no inconsistencies.

- 76. (Currently Amended) The system as in claim 42, wherein the offer providing section module operates to:
- a. determine whether there is an offer accompanying the request for the selected item of information received from the consumer; and
- b. supply an offer to the consumer when there is no offer accompanying the request received from the consumer.
- 77. (Previously Presented) A system for delivering electronic information from a first location to a second location wherein the first location sends to the second location a content reference using a computer network comprising:
- a. a central location for receiving from said second location a request to render a selected item of information identified by the content reference;
- b. an authorizing section which receives from the central location an identification of the selected item of information; determines whether the second location is authorized to use the selected item of information; and generates an authorization signal when the second location is appropriately authorized; and

c. a rendering section which receives the authorization signal and renders the selected item of information at the second location in accordance with the authorization signal.

- 78. (Previously Presented) The system as in claim 77, further comprising a delivering section for providing the selected item of information identified by the content reference to the second consumer.
- 79. (Previously Presented) The system as in claim 77, further comprising:
- a. an offer providing section for providing the second consumer with one or more offers for the selected item of information; and
- b. a selection input section for receiving from the second consumer a selection of one of the offers for the selected item of information.
- 80. (Previously Presented) The system as in claim 77, wherein the monitoring section which operates to:
- a. reference an offer associated with the content reference received from the second consumer;
 - b. verify the validity of the associated offer; and
 - c. determine whether the request to render is consistent with the associated offer.

81. (Currently Amended) A computer readable medium encoded with processing instructions for implementing a method for distributing electronic information using a computer network, the method comprising:

- a. receiving from a consumer a request for a selected item of information;
- b. formulating one or more offers based on predefined <u>upstream</u> business rule parameters wherein the one or more offers are associated with the selected item of information;
 - c. dynamically updating the predefined upstream business rule parameters;
- [[c] <u>d</u>. providing the one or more offers to the consumer <u>based on the dynamically updated</u> <u>business rule parameters</u>;
 - [[d]] e. receiving a selection of one of the offers from the consumer; and
- [[e]] \underline{f} . delivering the requested information to the consumer and enabling the consumer to use the delivered information in accordance with the selected offer.
- 82. (Previously Presented) A computer readable medium encoded with processing instructions for implementing a method for distributing electronic information using a computer network, the method comprising:
 - a. sending a content reference from a first consumer to a second consumer;
- b. at a central location, receiving from said second consumer a request to render a selected item of information identified by the content reference;
- c. determining whether the second consumer is authorized to use the selected item of information; and

d. at the second consumer, rendering the selected item of information when the second consumer is authorized to use the selected item of information.

- 83. (Currently Amended) An apparatus for distributing electronic information using a computer network, comprising:
 - a. a processor; and
- b. a memory in operative connection with the processor for storing the processing instructions enabling the processor to:
 - (i) receive from a consumer a request for a selected item of information;
- (ii) formulate one or more offers based on predefined <u>upstream</u> business rule parameters wherein the one or more offers are associated with the selected item of information;
 - (iii) dynamically updating the predefined upstream business rule parameters;
- (iii) provide the one or more offers to the consumer <u>based on the upstream</u> business rule parameters;
 - (iv) receive a selection of one of the offers from the consumer; and
- (v) deliver the requested information to the consumer to enable the consumer to use the delivered information in accordance with the selected offer.
- 84. (Previously Presented) An apparatus for distributing electronic information using a computer network, comprising:
 - a. a processor; and

b. a memory in operative connection with the processor for storing the processing instructions enabling the processor to:

- (i) send a content reference from a first consumer to a second consumer;
- (ii) at a central location, receive from said second consumer a request to render a selected item of information identified by the content reference.
- (iii) determine whether the second consumer is authorized to use the selected item of information; and
- (iv) at the second consumer, render the selected item of information when the second consumer is authorized to use the selected item of information.
- 85. (Previously Presented) A method for distributing electronic content using a computer network comprising the steps of:
 - a. identifying an item of electronic content for distribution to at least one consumer;
- b. preparing at least one offer for distribution of the item based on predetermined distribution rules;
 - c. presenting to the consumer at least one offer for the item;
 - d. receiving a response to the offer from the consumer;
 - e. formulating a valid offer for the item comprising at least one of:
- i. confirming that the offer is consistent with the corresponding distribution rules for the item;
- ii. modifying the offer to provide an alternative offer that is validated to be consistent with the corresponding distribution rules for the item; and

- iii. furnishing a default offer;
- f. receiving an acceptance of a selected valid offer from the consumer;
- g. delivering the item to the consumer; and
- h. enabling the consumer to use the item only according to the accepted offer.
- 86. (Previously Presented) A method for distributing electronic content using a computer network comprising the steps of:
 - a. identifying an item of electronic content for distribution to at least one consumer;
- b. preparing at least one offer for distribution of the item based on predetermined distribution rules;
 - c. presenting to the consumer at least one offer for the item;
 - d. receiving a response to the offer from the consumer;
 - e. formulating a valid offer for the item comprising at least one of:
- i. confirming that the offer is consistent with the corresponding distribution rules for the item;
- ii. modifying the offer to provide an alternative offer that is validated to be consistent with the corresponding distribution rules for the item; and
 - iii. furnishing a default offer;
 - f. receiving an acceptance of a selected valid offer from the consumer;
 - g. delivering the item to the consumer;
 - h. determining whether the consumer has a player for the item;
 - i. delivering the player to the consumer when the consumer does not have the player;

- j. activating the player for the consumer; and
- k. enabling the consumer to use the item only according to the accepted offer.
- 87. (Previously Presented) A method for distributing electronic content using a computer network comprising the steps of:
 - a. receiving a candidate offer from a retailer;
 - b. certifying the candidate offer as a certified offer;
 - c. sending the certified offer to the retailer;
 - d. receiving from a consumer a request for the item;
 - e. providing at least one certified offer to the consumer;
 - f. receiving acceptance of a certified offer from the consumer;
 - g. delivering the item to the consumer; and
 - h. enabling the consumer to use the item according to the accepted offer.
- 88. (Previously Presented) The method as in claim 87, further comprising the steps of:
- a. preparing at least one offer for distribution of the item based on predetermined distribution rules; and
 - b. formulating a valid offer for the item comprising at least one of:
- i. confirming that the offer is consistent with the corresponding distribution rules for the item;
- ii. modifying the offer to provide an alternative offer that is validated to be consistent with the corresponding distribution rules for the item; and

- iii. furnishing a default offer.
- 89. (Previously Presented) A method for distributing electronic content using a computer network comprising the steps of:
- a. creating a content reference relating to the electronic content, wherein the content reference only refers to the electronic content;
 - b. selecting, by a user, the content reference;
 - c. determining an offer for the selected content reference at a reference service; and
 - d. returning the offer to the user.
- 90. (New) A system for distributing electronic information over a computer network comprising:

predefined upstream business rules regarding electronic information and including distribution rules and settlement rules;

- a reference service including the distribution rules;
- a financial clearinghouse including the settlement rules; and
- a content reference identifying the electronic information;

wherein the reference service receives the content reference from a consumer, searches the distribution rules to determine an offer for the electronic information, and returns the offer to the consumer; and

Application No.: 09/471,971 25 Docket No.: 09386/100F051-US1

wherein the financial clearinghouse receives a notification that the consumer accepted the offer and searches the settlement rules to determine at least one payment to a value chain participant.

91. The system of claim 90, wherein the distribution rules are dynamically updated.
